

# SUMMER STUDENTS.

DESY International Summer Student Program 2021  
19 July to 10 September

DESY is one of the world's leading research centres for photon science, particle and astroparticle physics as well as accelerator physics.

Each summer DESY offers undergraduate students in physics, related natural science disciplines or computing the possibility to participate in the research activities of the Hamburg and Zeuthen (near Berlin) laboratory sites.

The 2021 program has been adapted to the special conditions due to the Covid pandemic and consists of two parts:

**1. Lecture program:** The virtual lecture program will take place August 2-27. The lectures cover the main research areas of DESY and illuminate the physics behind it. The lectures are open for all interested students.

**2. Individual work projects:**

We offer about 40 work projects in the following research areas: **Photon Science, Accelerators, Astro-Particle and Particle Physics and Computing.**

There are three types of projects:

- Pure online projects
- Tandem projects with one student on-site collaborating with another student working from remote
- On-site projects

On-site participation is restricted to students residing in Germany.

The application deadline for work projects is **31 March 2021**. Qualified applicants should have completed three years of full time studies at university level by summer 2021.
